Radiologic Technology Program Goals:

1. The program will graduate students with the knowledge and skills necessary to be clinically competent.
2. The program will graduate students with the ability to display effective communication.
3. The program will prepare students to successfully apply critical thinking and problem-solving skills.
4. The program will provide the students with the knowledge to evaluate the importance of professional growth and development within the field of radiologic technology.

Mission Statement:

The Radiologic Technology Program, through its curricular offerings, provides educational experiences to prepare students to function as a competent entry-level technologist with the essential knowledge necessary to meet the employment needs within radiologic technology.

Radiology Program Objectives:

1. The Radiology Program will provide a clinical site which offers entry level experience in order to achieve the required clinical competencies.
2. The Radiology Program will maintain a minimum of 75% pass rate for the National Radiology Board exam.
3. The Radiology Program will provide lab equipment conducive to real life clinical experiences.
