Directions for MyMathTest

If you are trying to place OUT of Mat 055 and into Mat 085 or higher:

1. Purchasing MyMathTest:
   - Go to [www.mymathtest](http://www.mymathtest) and click on buy now. Using a credit card, pay $10 and buy access to MyMathTest.
   - On the last page of the process, print out your registration. It will list your login name. Write your password on that page and keep the page for future reference.
   - The program is good for four months.

2. Logging into MyMathTest:
   - Go to [www.mymathtest](http://www.mymathtest) and click on Log in. Using the user name and password you created to purchase the program, log in.
   - The program ID you will enter is XL0S-H19N-301Z-60W2

3. Using the program:
   - Go to take a test. Pick a topic from the topics listed (starting with Pretest for Elementary Algebra) and take a test. Pick the topic or topics in which you think you are weak. If you’re not sure, take all of the tests. You may use a calculator. Once you have taken one or more tests, a study plan will be created for you.
   - Go to Study Plan and click on Show What I Need to Study. This will tell you the topics you need to study/work on. If you click on a section, problem numbers will appear and before you start the problems, you can watch a section video. Once you start the problems you will be able to use “Help me Solve This” or “Show me an Example.”
   - Once you are online, there is an instructor who will answer any questions you have.
   - Once you have completed the study plan for a given topic, retake the test. Once you have scored 100% on the pretest, you have mastered that topic.

GOOD LUCK!
