

**Statement on Triton Network Outage**

On February 6, we became aware of suspicious activity within our computer network when some data and programs became unavailable. We promptly contacted authorities and commenced an investigation. We also engaged cybersecurity experts to conduct an independent investigation of the suspicious activity and restore access to programs and data within our network.

The investigation is ongoing. We have no evidence of unauthorized access to personal information within our network, and it is our belief that there was none. We take this situation extremely seriously, as protection of our personal information is one of our highest priorities.

Our cybersecurity experts are continuing their independent investigation, as are authorities. Because this is an ongoing investigation, we are unable to comment beyond what has already been shared.
