

TRITON COLLEGE HEALTH AND SAFETY

Our priority is the safety and wellbeing of our students, faculty and staff. Requirements and resources for Triton College are aligned with CDC, IDPH, and Cook County Department of Public Health guidelines.

Vaccination and Testing

All students and employees must have proof of full vaccination or undergo weekly testing to be on-campus. Free SHIELD saliva-based testing is available in T-156 on campus. Proof of vaccination or weekly test results must be uploaded to Cleared4.

Self-Certification

All employees, students, and guests are required to self-screen for COVID-19 symptoms on the Cleared4 Daily Symptom Checker each day they are on campus.

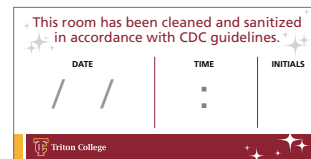

Face Coverings

All Triton employees, students and guests must wear a mask in all indoor spaces on campus.

Classroom Sanitization

Classes that have been cleaned will be marked with a sticker showing the times when the class was cleaned.

Air Purification Measures

Triton College has installed two different types of air purification technology throughout campus. The first type is Bi Polar Ionization Generators that were installed in the HVAC System ductwork, which is effective in neutralizing airborne and surface pathogens.

The second is Wall Mounted Air Purifiers (pictured on right) that were installed in all campus classrooms and common areas which utilize carbon and HEPA Filtration in addition to Bi Polar Ionization.

Safety Protocols

If you have any symptoms of the COVID-19 virus, or have tested positive for COVID-19, you must contact your supervisor and the Director of Health Services at laurahill@triton.edu. Do not come to campus unless authorized to do so by Director of Health Services Laura Hill.

No matter who you are or what you aspire to be ...

There's
a place
for you.
